features:

Modern Design.

Available in a choice of 3 models - Instant, Freshbrew, Espresso.

Fully automatic hot drink service with impressive 300 cup capacity.

Implementing latest N&W coffee making technologies.

Drinks can be dispensed into your own cup.

Free vend and jug fill option for guests, which is controlled by a management key.

Hot water selection on all models.

Optional base cabinet.

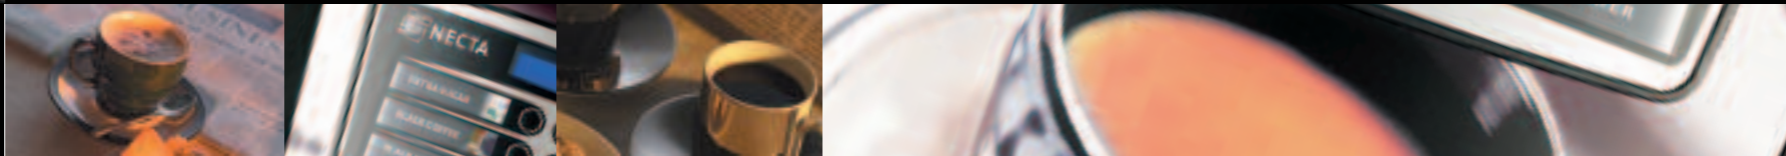

Water tank and pump kit available for unplumbed sites.

Other possibilities for banking with the Snakky line.

For more than a decade N&W's Brio tabletop beverage system has been synonymous with style, reliability and ease of use – the benchmark for high quality drinks performance from a compact machine.

The launch of Brio in 1995 and Brio 250 in 2000 was greeted by critical acclaim and now another exciting new chapter has been written in the Brio's continuing success story with the development of the Brio 3 system.

The third generation unit builds on the success of its predecessors and offers even more functionality and impressive features. There's higher capacity, more drinks choice, faster delivery and more user-friendly qualities, for both operators and consumers.

Available in Espresso, Instant and Freshbrew versions, the Brio 3 has a maximum 300 cup capacity and can dispense paper as well as traditional plastic cups. In addition the Espresso version utilises an advanced Z 3000 brewer whilst the Freshbrew machine benefits from the unique Sigma brewer – and can also dispense drinks into a jug if required making it ideal for meetings. In addition the ingredient delivery and mixing system is optimised for continuous quality drink preparation.

The Brio 3 is just 760mm tall, 540mm wide and 585mm deep. It weighs 67kg and benefits from improved internal access and an enhanced two line alphanumeric LCD display.

There are 14 push button selections including two pre-selections that are all centrally located within an eye catching photographic panel that is easy to change and customise.

The Brio 3 can be 'banked in' to operate with other N&W equipment such as the Snakky and Snakky SL vendors to form a fully co-ordinated refreshment solution.

All the capacities, such as cups, ingredients and waste, are maximised, resulting in fewer visits for filling. The drink delivery times are optimised whilst it is easy to maintain.

An optional base cabinet is available in two versions (standard or equipped) and the Brio 3 is also compatible with most payment systems. For example it can combine a traditional coin operation with N&W's ZIP cashless technology within the same machine.

The Brio 3 builds on N&W's respected reputation for pushing back the boundaries as we remain at the forefront of the latest industry trends and developments. Put simply, the Brio 3 is technology evolved.

Instant	Freshbrew	Espresso
Instant Coffee	Instant Coffee	Fresh Bean Coffee
Espresso	Espresso	Espresso
Cappuccino	Cappuccino	Cappuccino
Decaf Instant Coffee	Decaf Instant Coffee	Instant Coffee
Instant Tea	Leaf Tea	Instant Tea
Chocolate	Chocolate	Chocolate
Chocomilk	Chocomilk	Chocomilk
Espressochoch	Espressochoch	Espressochoch
Hot Water	Hot Water	Hot Water

• Sugar and Extra Sugar pre-selection on all models.

In order to produce the highest quality drinks, N&W recommend the installation of a resin based water filter to drinks machines fitted with espresso (coffee bean) brewers.
