Price Banks	Programmable		
Payment System	Compatible with all major coin and cashless systems using Executive MDB or BDV protocol		
Display	4 Line alphanumeric LCD		

features:

The Rondo spiral machine range from Necta offers many innovative and exiting features to ensure effective and satisfying snack vending. Available in a choice of layouts – snack only, can and bottle, or snack, can and bottle – the Rondo is flexible and can be configured to vend a wide range of items.

A product detection system has sensors that detects when a product has been successfully dispensed. If no product is delivered, the customer can make another selection or have the payment returned.

Operating the Rondo couldn't be easier with simple programming and flexible spiral and tray layouts. Spirals, motors and separators are simple to remove and trays can be adjusted every 1.5cm in height, allowing a wide range of items to be vended from the Rondo. Advanced 16-bit electronics ensure compatibility with a wide range of protocols, payment systems and GSM applications.

All of the above, combined with designer looks, ensure the Rondo is certain to appeal to a wide range of customers.

Flexible layout offering a wide range of drinks, snacks and confectionery.

Cans and bottles can be vended from the same machine.

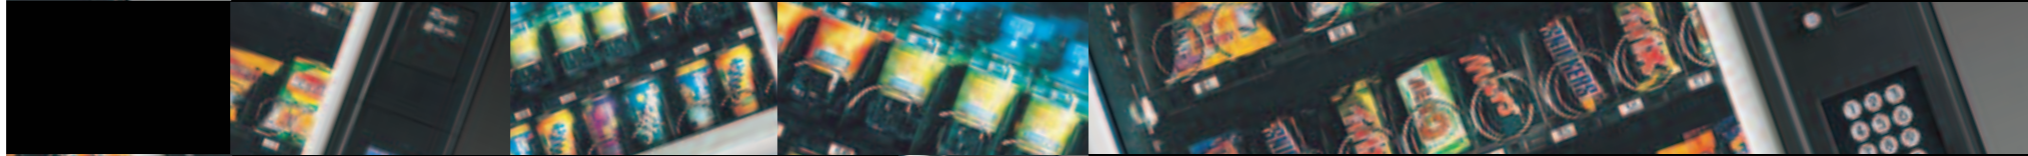

Co-ordinating range of drinks, food and can vendors available.

Double glazed door for safety and efficiency.

Impressive capacity with up to 40 selections.

Ergonomic delivery bin for easier collection of vended products - one hand operation.

Vend detector system ensures customer satisfaction every time.

Payment systems fitted to the Rondo are located in a separate compartment to the chilled area for displaying products. Therefore, the temperature is preserved whilst collecting cash and sales data from the payment units.

The innovative (patented) front hot air outlet allows the Rondo to be safely located against a rear wall, without damaging the cooling unit, saving a valuable 10cm on the depth of the machine. Vended items can be easily accessed as the outward opening patented delivery bin has been designed for ease of use.
