Zenith

The Zenith has been the talk of the vending industry since its launch, as it offers great looks, reliability and quality drinks. With its curved front door and choice of backlit photographic panel the Zenith suits the most design conscious workplace.

There are four models available, offering an exceptional drinks menu of up to 24 selections to suit every situation. This can be further enhanced by an optional cold still or still and carbonated drinks facility.

The clearly labelled direct selection buttons ensure that the Zenith is extremely user friendly. All models offer a pre-selection strength and extra sugar option, which means drinks can be personalised to suit every client's taste.

Hot only models offer a choice of base coffee for the cappuccino and espresso choc drinks, which allows decaffeinated and premium coffees to be used. The Zenith really is the connoisseur's choice as up to three different coffee qualities can be dispensed from one machine.

An amazing 900 cup capacity makes the Zenith the ideal drinks solution for busy sites, with the simple direct selection service allowing beverages to be served quickly and without fuss. A jug fill and free vend option is available via a management key, which is ideal for providing beverages for meeting and guests.

Advanced 16-bit electronics, multiple communication protocols and the most up to date software ensures ease of operation, which will delight both the end user and operator. The innovative technology used by Necta ensures the highest quality drinks available from a vending machine.

A coordinating range of snack, can and food vendors is available to create a banked effect and provide a full refreshment service.

In order to produce the highest quality drinks, N&W recommend the installation of a resin based water filter to drinks machines fitted with espresso (coffee bean & leaf tea) brewers.
